

## List of scientific publications

### **Books**

1. Madej L., Development of the modeling strategy for the strain localization simulation based on the Digital Material Representation. AGH University Press, 2010.
2. Pietrzyk M., Madej L., Rauch L., Szeliga D., Computational Materials Engineering: achieving high accuracy and efficiency in metals processing simulations, Butterworth-Heinemann Elsevier, 2015.
3. Madej L., Wykorzystanie modeli wirtualnych mikrostruktur w inżynierii metali, Wydawnictwa AGH, 2017.

### **Book chapters**

1. Madej L., Hodgson P.D., Pietrzyk M., Multi scale analysis of material behavior during deformation processes, in: Foundation of Materials Design, eds., Krzysztof J. Kurzydlowski, Boguslaw Major and Paweł Zieba, Research Signpost, Kerala, 2006, 17-47.
2. Pietrzyk M., Madej L., Szeliga D., Kuziak R., Pidvysotskyy V., Paul H., Wajda W., Rheological models of metallic materials, Metalurgia 2006, 325-364.
3. Grosman F., Madej L., Ziolkiewicz S., Nowak J., The new incremental forming process, Metalurgia 2010, 223 - 241.
4. Banet E., Baster B., Duda J., Gaweł B., Jankowski R., Jędrusik S., Macioł P., Macioł A., Madej L., Nowak J., Paliński A., Paradowska W., Pilch A., Puka R., Rębiasz B., Stawowy A., Śliwa Z., Wrona R., Zarządzanie regułami biznesowymi: perspektywy zastosowania w zarządzaniu technologią, pod red. Andrzeja Macioła i Adama Stawowego, Akademia Górniczo-Hutnicza im. Stanisława Staszica, 2011.
5. Madej L., Sitko M., Parallelization of the Monte Carlo static recrystallization model, Lecture Notes in Computer Science, 2014, 8500, 445–458.
6. Madej L., Sieradzki L., Sitko M., Perzynski K., Radwański K., Kuziak R., Multi scale cellular automata and finite element based model for cold deformation and annealing of a ferritic-pearlitic microstructure, in Multiscale Materials Modelling – approaches to full multiscaling, eds. Siegfried Schamuder, Immanuel Schafer, De Gruyter, 2016.

### **Impact factor publications (thomson scientific)**

1. Gawad J., Kuziak R., Madej L., Szeliga D., Pietrzyk M., Identification of rheological parameters on the basis of various types of compression and tension tests, Steel Research International, 2/3, 2005, 131-137 (IF 0.345).
2. Madej L., Talamantes-Silva J., Howard I.C., Pietrzyk M., Modeling of the initiation and propagation of the shear band using the coupled CAFE model, Archives of Metallurgy and Materials, 2005, 563-573 (IF 0.179).
3. Madej L., Hodgson P.D., Pietrzyk M., Multi scale rheological model for discontinuous phenomena in materials under deformation conditions, Computational Material Science, 38, 685-691 2007 (IF 1.135).
4. Pietrzyk M., Madej L., Kuziak R., Multi scale CAFE simulation of the multi step cold forging operations, Steel Research International, 78, 2007, 771-776 (IF 0.345).
5. Madej L., Hodgson P.D., Pietrzyk M., The validation of a multi scale rheological model of discontinuous phenomena during metal rolling, Computational Materials Science, 41, 2007, 236-241 (IF 1.135).
